

Resume

Name: TED HSU

Year of Birth: 1987

Nationality: Taiwan

E-mail: sohotguys@gmail.com

Objective

Flutter & Android Developer

Education

National Taiwan Normal University

M.S. in Marine Environmental Sciences

Skills

Kotlin / Flutter

Working Experience

I. 2024/03 - Present

Company Name: [智鈇星平台服務 \(Futures Trading\)](#)

Title: Android developer

Responsibilities:

- Developed Android applications using MVI architecture, Hilt for dependency injection, Retrofit for network communication, and Jetpack Compose for modern UI in Kotlin.
- Built and packaged AAR-based masked apps for deployment in the Chinese market.
- Managed and developed multiple projects simultaneously.
- Implemented CI/CD pipelines for automated app packaging and deployment.
- Utilized the n8n automation platform to streamline the development workflow.
- Integrated AI-driven chat systems into applications.

II. 2022/08 until 2024/01

Company Name: 宏博網路科技有限公司

Title: Flutter & Android Developer

Responsibilities:

[Flutter]

- Implemented GetIt design pattern for dependency injection.
- Used Channel, Broadcast, and async for asynchronous operations.
- Developed M3u8 playback and video download features.
- Implemented SQL persistence in Flutter.
- Integrated third-party frameworks such as Dio.
- Implemented App Links.

[Android]

- Applied MVVM design pattern.
- Implemented Kotlin SQL persistence.
- Designed modular architecture using Coroutines.
- Developed M3u8 playback and video download features.
- Designed Kotlin-based UI components.
- Integrated third-party libraries such as Glide.
- Implemented App Links.

III. 2021/08 until 2022/07

Company Name: [Google \(Contract total 1yr\)](#)

Title: Android Developer (Android, Python)

Responsibilities:

- Designed test system firmware interfaces for wearable devices (Android Watch).
- Designed test system firmware interfaces for Pixel phones (Pixel 6, 6 Pro, 7, etc.).
- Developed data APIs using Python.
- Applied design patterns to solve specific project issues.
- Used Fig (similar to Git) for version control.
- Maintained clean, simple, and efficient code.
- Performed code reviews to ensure code quality and safety.
- Wrote unit tests to ensure code reliability.

IV. 2018/03 to 2021/07

Company Name: Fortunate International Information Co., Ltd.

Title: Full Stack Developer (Android, iOS, Flutter, PHP, MySQL)

Responsibilities:

[Flutter]

- Social Platform (GoMySki)
- Designed Android and iOS applications.
- Used Git for version control.
- Developed Web-APP using Ruby on Rails.
- Implemented push notification services using Firebase.
- Published apps on Google Play and Apple App Store.

[Android/iOS]

- Developed native apps using Kotlin and Swift.
- Implemented sync mechanisms for withdrawals, deposits, and betting.
- Used AsyncTask for processes such as APK updates.
- Integrated APIs via JSON.
- Implemented push notifications using Firebase.

[PHP]

- Developed login mechanisms using sessions and cookies.
- Integrated WeChat SDK for login functionality.
- Implemented backend sync and double verification for transactions.
- Developed game rebate systems.
- Automated tasks using crontab CLI scripts.
- Designed JSON APIs.
- Performed web scraping using PhantomJS.

[MySQL]

- Used MySQL 8.0.
- Designed robust database schemas.

V. 2016/10 to 2018/03

Company Name: Bule Star Co., Ltd.

Title: Full Stack Developer (Android, iOS, Java, MySQL)

Responsibilities:

[Java]

- Video Game and Slot Machine Development:
- Built SSM architecture (Spring + SpringMVC + MyBatis).

- Sync mechanisms for betting, withdrawal, etc.
- Use IoC, DAO, POJO to build JAVAEE.
- Live broadcast development.
- Version control with SVN.

[Android/iOS]

- Native code (Android & Objective-C).
- API integration and UI design.
- Use AsyncTask for APK updates.
- Firebase push notifications.
- Version control with SVN.

Company Name: HERAN Co., Ltd.

Title: Android developer

Responsibilities:

- Android TV system design:
- Voice control via Android phone.
- Bluetooth file transfer.
- Socket communication between phone and TV.
- IoT integration with home appliances.
- Version control with SVN.
- API integration via JSON.

Recommending of reason

My name is Ted Hsu, and I'm a software developer from Taiwan with over 11 years of Android development experience. In addition, I bring 4 years of iOS development, 1 year of Flutter development, and 2 years each in PHP and Java.

Throughout my career, I've worked across a wide range of industries and companies—including projects with Google on the Pixel Watch and Pixel Phone. I've also contributed to the development of adult social platforms, mobile lottery and gaming apps, slot machine/eSports platforms, and IoT solutions.

Beyond corporate projects, I've partnered with clients to build systems involving facial recognition, digital learning platforms like "Pandora Zone," and interactive advertising machines for mobile, tablet, and TV—deployed in major retail chains such as Watsons, Cosmed, and SASA across Taiwan and Shanghai.

In addition to my technical skills, I place high value on teamwork and communication. I believe that effective collaboration is key to building great products and solving complex problems. I'm excited about the opportunity to bring my experience, adaptability, and enthusiasm to your team.

Thank you for taking the time to read my introduction. I look forward to the opportunity to connect and contribute!
